

Sport et Citoyenneté

Le Sport au service de la société

Who are we?

Come and join us
as the association is going forward with you !

A EUROPEAN REFERENCE *THINK TANK* IN THE FIELD OF SPORT

Launched in September 2007 in France, *Sport et Citoyenneté* is a forum for **new thinking** and **lobbying** which aims at putting forward the core values of sport in society, in the realm of politics, economics and media issues.

To achieve its goals *Sport et Citoyenneté* relies on its scientific committee, made up of more than fifty French and European scientists considered as experts in their field. Each quarter a **bilingual scientific journal** on sport is being published in which we develop an important theme of society (Sport and Health, Europe and Sport law, Women and Sport, Sport and Social Inclusion).

Thanks to multidisciplinary and transverse reflection, the aim is to put people in relation with others (associations, federations, politicians, sportsmen, scientists...) to enable an exchange of views and an analysis of the different policies.

The association also organizes and takes part in **roundtables** and **conferences** which deal with citizenship through sport across Europe.

Sport et Citoyenneté thus wish to promote **intercultural and civic dialogue** in Europe while consulting citizens and civil society on major sport issues.

Thus Sport et Citoyenneté is:

- SS AN ORGAN OF REFLECTION on role and place of sport in society.
- SS A FORCE FOR SUGGESTION which deals with sport as an educational tool and a vector of the awakening of citizenship .
- SS A REFERENCE PLATFORM for national and European public authorities.
